

Best Practice-1

Title of the Practice: “Late Shri Sai Das Talwar Meritorious Scholarship”

Objectives of the Practice:

To promote students' interest in good academic performance, the principal of GDC Chakrata has created the Late Shri Sai Das Talwar Meritorious Scholarship. Scholarships promote healthy competition among students, which is associated with higher college grades as a result of healthy competition. In other words, it empowers you to achieve your academic and career goals by removing the financial barrier. A primary objective of this scholarship is to promote the achievement of high levels of achievement among students and to create an environment that encourages them to compete against each other at various levels.

The Context:

A social worker and an avid lover of studies in Uttarkashi city, the late Sai Das Talwar, was the father of the college's principal, and he was a social worker and a lover of studies himself. As Founder Member and Treasurer of the Adarsh Ramlila Samiti, Uttarkashi since 1962, he has continued to work as the Registrar of the organization. The Uttarkashi Samman was also awarded posthumously to him. The college is providing this cash scholarship in his name.

The Practice:

The college Principal, Prof. K. L. Talwar, has initiated the Late Shri Saidas Talwar Meritorious Scholarship in honour of his late father in order to encourage the most meritorious students. It is under this scheme that Rs 1100, a medal and a citation will be given to the top graduate of the first year of graduation, Rs 2100, a medal and citation will be given to the top graduate of the second year of graduation, and Rs 3100, a medal and citation will be given to the top graduate of the third year of graduation. Under this program, cash scholarships were awarded to the following students.

In the session 2019-20, on September 25, 2019, Ms. Divya Rana, Ms. Anisha Tomar, and Ms. Ranjita were given scholarships of Rs. 3100, Rs. 2100, and Rs. 1100 respectively.

In the session 2021-22, on December 14, 2021, Ms. Anisha Tomar, Ms. Rinki Chauhan, and Ms. Neha Tomar were given scholarships of Rs. 3100, Rs. 2100 and Rs. 1100 respectively.

In the session 2022-23, on October 12, 2022, Ku Aanchal Tomar and Ku Neha Tomar were given scholarships of Rs 3100 and Rs 2100 respectively.

With this scholarship scheme started by the principal, competition has been established among the students to get the highest marks. The PTA welcomes this best practice of the college.

Evidence of Success:

The work was supported by higher officials as well as the PTA. Consequently, college examination results, both quantitative and qualitative, have improved as a result of this, which has led to an increase in the academic performance of students.

Problems Encountered and Resources Required:

This college is located in the remote area of the tribe Jaunsar. Compared to the facilities, the number of students admitted here is less. If in any case, the student is not able to obtain first-division marks, then he or she remains deprived of this scholarship. The problem came before the college in two sessions. Although a positive message has been sent since the commencement of this scholarship. And there is a qualitative improvement in the examination results.

Best Practice-2

Title of the Practice: “Say No To Single Use Plastic”

Objectives of the Practice:

By using polythene, we are not only harming the environment but are also inviting serious diseases. By throwing polythene like this, drains and sewer lines get choked. In this way, they also cause serious diseases like cholera, typhoid, diarrhea, and hepatitis B.

Inside plastic bags, there is a substance called synthetic polymer, which is very harmful to the environment and because it is non-biodegradable, its disposal is also very difficult. Since polythene bags are lightweight, they easily fly from one place to another by the wind. Many people tie the leftover food of the kitchen in polythene carry bags and throw them in the open, which makes the cows sick and even die. For this reason, single-use plastic is banned in the college campus and emphasis is being laid on the use of cloth bags.

The Context:

Cloth bags are the best alternative to polythene carry bags. The cost of handmade bags made from old clothes is also negligible. For this purpose, the college has started a campaign to make bags from old clothes under the program of environmental protection under the National Service Scheme. Girl students themselves made bags from old clothes from their homes.

The Practice:

Under the SAPCC State Action Plan on climate change, the college adopted the campaign 'Say no to Single use plastic'. Under this program, the girl students registered under the National Service Scheme were trained by female teachers to make attractive bags and carry bags from old clothes. As a result, the girl students of the college made attractive bags from old clothes and got them deposited in the N.S.S Cell of the college. For the purpose of environmental protection, exhibitions of these cloth bags and carry bags are also organized from time to time to make people aware. The use of single-use plastic is discouraged by displaying these bags in Chakrata

Bazar, located 06 km away from the college. Along with this, empty glass bottles were also trained to make attractive vases using the Dip-N-Paint technique.

Evidence of Success:

In order to ensure the success of this program of the college, the Board of Trade, Chakrata, and the Cantt Board have given special support to it. It has been a success for the college and its staff to use handmade bags instead of plastic bags as a result of this campaign.

Problems Encountered and Resources Required:

Not all the students have been able to be brought under this ambit. And the effort of the college is that every girl student must make at least one handmade bag. It is the effort of the college government that slogans related to environmental protection should also be written on handmade bags.
